PROJECTS

Website - Encyclopedia Project – www.balochistanencyclopedia.com   Dec. 2017 - Present

An engaging crowd-sourced website to document my indigenous culture and history utilizing front-end publishing and editing, user authentication and instant search

- *Tools used: React, Firebase, Algolia and Material-UI*

Web App - Covered - https://covered-d3bfe.firebaseapp.com   Jan. 2018 - Mar. 2018

A single-page web application to simplify scheduling needs of shift workers developed in collaboration with two other team members where I was responsible for building the user interfaces.

- *Tools used: React, Firebase, MobX, Travis CI and Material-UI*

Website - Balochi Dictionary Project - www.balochidictionary.com   2015 - 2017

An online dictionary website in my native language with more than 30,000 unique entries; also available as a Facebook Messenger bot to look up words; built with NodeJS, Express and Heroku

- *Tools used: Flask, Materialize CSS, jQuery and Handlebars.js*

PROFESSIONAL EXPERIENCE

Software Engineer Intern - Cerinfo, Seattle, WA - www.cerinfo.com   Jun. 2018 - Present
